

● Complete Automation Solution Under One Roof ●

About **Electroquip**

- ▶ 30+ Years of excellence in industrial automation
- ▶ 5,00,000+ units successfully operating across India
- ▶ Leading manufacturer of DC drives & vibrator controllers in India
- ▶ Custom automation control panels (CE, UL, ATEX-certified)
- ▶ Embedded solutions & IoT-based control systems
- ▶ Prompt & efficient after sales service
- ▶ Expert R&D team with decades of industry experience
- ▶ Integrated Mechanical & Electronic Design Consultation

Our **Vision**

- To empower industries worldwide by delivering seamless, future-proof automation that maximizes operational efficiency, sustainability, and competitive advantage for every client.

Our **Solutions**

Automation Systems

- PLC/HMI programming
- SCADA implementation
- Industrial networking
- Custom automation workflows
- Control system AMC

Control Panel Designing

- Compliance Assured
- Robust Enclosures
- Precision Engineering
- Modular Flexibility
- Global Standards

Embedded Solutions

- Custom industrial controllers
- IoT monitoring systems
- Sensor integration & calibration
- Tailored client solutions

Integrated Automation Solutions

- **EQ** provides complete industrial automation and panel solutions, proudly serving many **leading pharmaceutical companies**. We specialize in **Schneider-based automation** systems and deliver high-performance solutions tailored to diverse industrial needs.
- **PLC/SCADA Programming** : Expertise across leading industry platforms for robust process control and real-time visualization. Technical skill and brand compatibility.
- **HMI Design & Implementation** : Intuitive Human-Machine Interface design ensuring easy monitoring, diagnostics, and operator control. User-centric design and ease of use.
- **Industrial Networking** : Establishing secure and reliable industrial communication protocols (Modbus - RTU/TCP, Ethernet, CAN, Profibus). Connectivity and future readiness.
- **Control System AMC** : Proactive Annual Maintenance Contracts to guarantee peak performance and minimize unexpected downtime.
- **SCADA Systems** : Expert SCADA system programming, user management and reporting.

R&D and Consultation

- **Design Consultation** : Expert guidance on optimizing existing or new material handling layouts for efficiency and reliability.
- **Mechanical R&D** : Dedicated research and development for non-standard or challenging applications.
- **Conveyor Systems** : Design and integration of robust mechanical conveyors for optimal flow and sequencing.
- **Vibratory Bowls & Feeders** : Specialized design and tuning of vibratory bowls and feeding systems to ensure reliable, high-speed parts orientation and delivery.

Advanced Control Panel Manufacturing

- **EQ** panels are more than enclosures; they are **precision-engineered solutions** designed for the harshest environments. We ensure every panel meets stringent global safety and performance standards.
- **Compliance Assured**: Manufactured to strict international standards: **CE, UL, and NEMA**.
- **Robust Enclosures** : Available in specialized materials and certifications to match your environment: Mild Steel (**MS**), Stainless Steel (**SS**), Flame-Proof (**FLP**), and **ATEX**-Certified for explosive atmospheres
- **Precision Engineering** : Featuring modular, organized internal layouts for **easy wiring, diagnostics, and maintenance**. We build panels that technicians trust.

Custom Innovation & Proprietary Design

- **Tailored to Specification** : We initiate embedded development based solely on your precise functional, mechanical, and performance requirements.
- **Confidentiality Guaranteed** : Your custom embedded product, including all associated IP and design files, remains strictly your proprietary property. We do not share, resell, or integrate your custom solution into any other client's project.

DC Drives & Vibratory Control

- Precision engineered solutions for seamless motor control and material handling

- EQ DC Drives** are engineered for precision, reliability, and smooth speed control, offering comprehensive protection for your **PMDC** and **Shunt** wound motors.
- EQ Vibrator Controllers** are optimized for inductive loads (coils/feeders), providing stable, linear output for seamless material feeding.
- Now offering : Complete Vibratory Feeding Solutions including **controller**, **coil**, **bowl**, and **feeding system** integration.

Our Clients

- Trusted by leading OEMs and machine manufacturers nationwide
